Dear

We are currently organizing a rowing club at the University of Michigan and will soon begin investing in equipment. We would like to become familiar with the kinds of equipment your firm makes available. Our members' interests cover all types of rowing and sculling, so we would like information on all of the boats and oars which you produce: eights, fours, pairs, quads, doubles, and singles of all kinds (convertible or not, with or without cox, racing or practice), as well as oars and sculls.

Specifically, we would appreciate receiving the following information:

- A current price list for boats and oars of each type.
- Their composition: wooden, fiberglass, etc.
- Estimated time between an order and delivery for the various types of boats and oars.
- Typical arrangements for down payments, shipping, pick-up, etc.

Thanks for your help--we look forward to hearing from you!

Sincerely,

Robert R. Verbrugge
